

# Dr. Tali Arviv Shares Her Career Defining Procedure

[Destinee Hughes](#) Posted On February 8, 2019

Dr. Tali Arviv specializes in aesthetics and has more than 10 years experience in laser-technology. At her practice, Arviv Medical Aesthetics, her goal is to enhance natural beauty while improving problem areas. With advanced technology and expert knowledge in the most cutting-edge techniques, Dr. Arviv and her team promote positive experiences at their center. Dr. Arviv sat down with *Haute Beauty* to discuss the new services being offered and her career defining procedure.

**My greatest achievement..**

Opening my second business location.

**The future of my field is..**

More non-invasive procedures and better results for face and body rejuvenation.

**The biggest misconception about my field is..**

That if you do cosmetic procedures you will not look natural however, I strongly feel this is up to the physician to keep you looking natural.

**My most requested procedures are..**

Thread lift, filler, botox.

**What are you best known for?**

Threads, lip fillers, and making people look better in a natural way.

**What sets my practice apart is...**

We are honest, professional, and we treat you like we would treat our family.

**What I love most about my profession is...**

The art of doing the right combination procedures to make people look and feel their best.

**Career defining procedure?**

O- shot and P shot, now have become an expert trainer and partnered with Specialty Med to train other medical providers.

**What new services are you excited to offer?**

Staying on top of whats available and what works to bring to the practice.  
More recently we have added Bellafill to our practice offering a more permeant filler as a solution to volume loss.
