Regenerative Protocols & Master Techniques

The PDO Thread Lifting Master Class is an advanced course intended for any skilled injector with or without prior thread lift experience, or someone who is already using threads, but wants more doctor-to-doctor expert guidance.

This advanced master class will explore the special skill of combining different lengths and types of threads to achieve the ultimate results, and how to utilize the microcannula technique for advanced areas including tear trough, lip, nose contouring, cheek and chin augmentation, pre-jowl sulcus, temples, and brow lifting. Dr. Arviv will also show how to combine thread lifting with PRP for total facial lifting and rejuvenation, and with HA fillers for optimized nose lifting, tip lifting, and alar augmentation results. Besides, attendees will learn how to use pharmaceutical peptides to reinforce naturally-occurring proteins in the skin for both maintenance and rejuvenation.

2 Days: PDO Thread Master Class - $7499*

1/2 Day: Additional Learning - $999*

Provider training for: MD, DO, PA, NP, RN, and ND
